#### General Advisory

- As per ERFs model of IMD, above normal rainfall is expected during 06.12.2023 to 12.12.2023 so farmers are advised to take precautionary measures for their crop accordingly. Looking to the dry weather condition in upcoming two days, farmers are advised to conduct harvesting and spraying operation in those days and keep their harvested produce in safe place because rainfall is expected after that. Cloudy condition along with moderate to high wind speed may increase the cold in upcoming days so frequent light irrigation should be advised in case of vegetable crops.
- Farmers those are using android mobile, are advised to use **Meghdoot** app for location specific weather forecast and agromet advisories and **Damini** app for early information about thunderstorm and lightning.

#### Crop and livestock Specific Agromet Advisory

Name of the crop	Crop Stage	Agromet Advisories
Paddy	Maturity/ Harvesting	<ul style="list-style-type: none"> <li>In case of crop having its maturity stage (85% or more of grains in panicles get matured) are advised to conduct harvesting operation before 3<sup>rd</sup> Dec. and keep their harvested produce in safe place to avoid damage due to adverse weather which will be expected between 4<sup>th</sup> to 6<sup>th</sup> Dec..</li> </ul>
Vegetable crops (Brinjal, Chilli, Cole crops etc.)	Sowing / planting / Vegetative stage	<ul style="list-style-type: none"> <li>Farmers should start planting of Cole crops like cabbage, cauliflower, broccoli etc. and use straw or polythene as a mulching material to maintain moisture as well as soil temperature in newly planted vegetable crops. Prevailing weather condition is favourable for incidence of diamond back moth in Cole crops so farmers should use pheromone trap in field to monitor insect attack. Farmers should conduct spraying operations in upcoming two days because rainfall along with high wind speed is expected after 3<sup>rd</sup> Dec.</li> </ul>
Animal Husbandry		<ul style="list-style-type: none"> <li>Farmers are advised to keep the animal shed clean and dry to avoid disease and insect attack and provide fresh clean drinking water to the animal and make proper provision</li> </ul>

<b>(Cow and Buffalo)</b>	<p>to protect the animal from cold as well as direct contact of rain because rainfall along with decrease in maximum temperature is expected during upcoming week.</p> <ul style="list-style-type: none"> <li>• Vaccination against FMD, HS and BQ should be advised and keep diseased animal in separate room away from healthy animal to avoid spreading of diseases.</li> </ul>
--------------------------	--

**Note: As per the special bulletin issued by MC, Bhubaneswar on dated:-1<sup>st</sup> Dec. 2023, “Well Marked Low Pressure Area concentrated into a Depression over Southeast adjoining Southwest Bay of Bengal (Pre-Cyclone Watch: Yellow Message).”**

This depression is likely to continue to move west-northwestwards, intensify into a Deep Depression by 2<sup>nd</sup> and further into a Cyclonic Storm over Southwest Bay of Bengal around 3<sup>rd</sup> December. Thereafter, it would move northwestwards and cross South Andhra Pradesh and adjoining North Tamil Nadu coast between Chennai and Machilipatnam around evening of 4<sup>th</sup> December as a **Cyclonic Storm**.

Under the influence of above mentioned condition light to moderate rain/ thundershower very likely to occur at one or two places during 03.12.2023 to 04.12.2023 and at a few places during 04.12.2023 to 05.12.2023 and at many places during 05.12.2023 to 06.12.2023 over the **Boudh** district.
