General Advisory

- Past weather condition is favourable for aphid and other sucking pest infestation in fruit, vegetable and
 oilseed crops so farmers are advised to make provision to protect their crops from these insects and take
 proper protective as well as preventive measures accordingly. There is no chance of rainfall in upcoming
 week days so farmers are advised to conduct any types of agricultural operations during that period when sky
 is clear.
- As per extended range forecast of IMD, rainfall is normal, maximum and minimum temperature is also expected to be normal for Odisha during 14.01.2024 to 20.01.2024.

Crop and livestock Specific Agromet Advisory

Name of the crop	Crop Stage	Agromet Advisories			
Paddy	Storage	• For safe storage, paddy grains need to be dried to below 14% and should be dried to below 12% moisture content for seed purpose.			
		1 1			
		The ideal moisture content is between 12-14% for milling. Paddy			
		should be stored in godown after proper cleaning and make			
		provision to avoid damage due to stored grain pest, rat, mites etc.			
Vegetable crops	Vegetative /	• Farmers should use straw or polythene as a mulching as well as			
(Brinjal, Tomato,	Flowering	covering material to maintain soil temperature as well as moisture			
Potato, Chilli,	stage/ Fruiting	in crop field and also protect the crops from cold.			
Cole crops etc.)		• Prevailing weather condition is favourable for late blight infestation			
		in Tomato and Potato so farmers should use Metalaxyl + Mancozeb			
		@ 2.5 g per liter of water as preventive as well as protective			
		measure against this disease. If possible, use 3 gram Trichoderma			
		per kg of seed during seed/seedling treatment to avoid wilt disease			

in vegetable crops.

Mustard	Flowering stage Past foggy weather condition is favourable for aphid and mu sawfly attack in mustard crop so its regular monitoring shoul advised. If attack noticed, then spraying of Imidachlorprid 0.33ml or Thiamethoxam @ 0.3g per liter of water for aphids Chlorpyriphos @ 0.5 ml per liter of water for control of mu	ld be id @ s and		
	saw fly at initial stage of attack.	istar a		
Animal	Farmers are advised to keep the animal shed clean and dry to avoid disease and in	nsect		
Husbandry	attack and also provide mineral mixture, jaggery etc. along with fresh clean drinking			
(Cow and	water to the animal and make proper provision (if possible use jute/gunny bags to cover			
Buffalo)	the animal as well as animal shed and straw as bedding material) to protect the animal			
	from cold because decrease in minimum temperature is expected during this week.
