- Chances of clear to partly clear sky during next five days.
- Chances of no rainfall during next five days.
- Maximum temperature is expected to be 28°C and minimum temperature is expected to be 12-15°C.
- Maximum and minimum relative humidity is expected to be 77-97%, and 32-54%, respectively.

Agromet Advisory for Koraput district

General:

- Use this dry spell for **post-harvest work, seed drying, and rabi land preparation.**
- Farmers can start sowing **black gram, green gram, lentil, or mustard** in upland and medium lands.
- Maintain storage hygiene — fumigate storage rooms if necessary.
- Avoid burning crop residues; incorporate them into soil to improve fertility.
- Regularly follow **local weather updates** and **Agromet advisories from AMFU_GKMS, Koraput.**
- Monitor advisories daily. Be prepared to reschedule field operations, irrigation, and chemical applications based on expected rainfall or thunderstorm events.

SMS Advisory	➤ Avoid burning crop residues; incorporate them into soil to improve fertility.
Crop and Livestock specific Advisory	
Crop (Stage)	ADVISORY
Rice:	<ul style="list-style-type: none"> ➤ Weather is dry and favourable for harvesting; continue harvesting and drying activities. ➤ Dry harvested paddy to 14% moisture before storage. ➤ Store grains in aerated, moisture-free godowns.
Pulses (Black gram, Green gram, Horse gram)	<ul style="list-style-type: none"> ➤ Dry weather is favourable for flowering and pod formation. ➤ Avoid moisture stress—go for protective irrigation if soil is dry.

	➤ Monitor for pod borers; use Neem-based pesticide (NSKE 5%) .
Finger Millet:	<ul style="list-style-type: none"> ➤ Good weather for field drying and threshing. ➤ Avoid stacking harvested panicles in the field overnight due to dew formation. ➤ After threshing, store grains in airtight bags. ➤ Utilize residual moisture for rabi pulses or mustard sowing.
Potato:	<ul style="list-style-type: none"> ➤ Increasing night temperatures favour tuber development. ➤ Maintain field moisture with light irrigation every 5–6 days. ➤ For early blight, spray Mancozeb @ 2.5 g/litre.
Vegetables (Tomato, Brinjal, Chilli)	<ul style="list-style-type: none"> ➤ Temperature and humidity conditions favour sucking pests. ➤ Spray Imidacloprid 0.3 ml/litre or Neem oil 3 ml/litre. ➤ Regular staking in tomato to avoid fruit touching the soil.
LIVESTOCK	
Cattle:	<ul style="list-style-type: none"> ➤ Night temperatures are low; protect young calves with dry bedding. ➤ Provide warm water for animals during early morning hours. ➤ Maintain regular deworming schedule.

For better agricultural benefits use, **OUAT KALINGA** products (Seedlings, Saplings & QPM, Tissue Culture Plants, Fruits & Vegetables, Value Added Products, Fingerlings/ Yearlings, Poultry chicks, Breeds, Mushroom & Spawn, Bio-Fertilizer, Bio-Pesticides, Vermi & Vermi Compost and Farm Implements).

IMD Weather forecast and Agro-meteorological advisory of Odisha location is now available on Meghdoot mobile app in English and Odia language.
